

IV. Building Envelope Standards

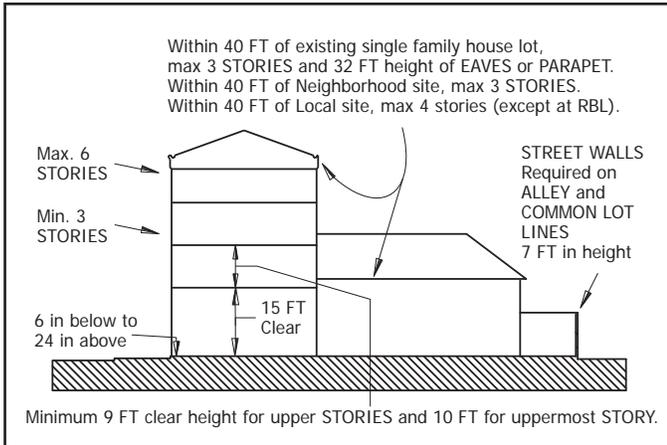

The REGULATING PLAN identifies the BUILDING ENVELOPE STANDARDS (BES) for all building sites within the Columbia Pike Revitalization District. The goal of the BUILDING ENVELOPE STANDARDS is the creation of a healthy and vital public realm through good STREET space. Deviations from the BUILDING ENVELOPE STANDARDS can be approved through a Special Exception Process as provided for in Section VII. Administration of this **Code** and in Article 11.1 and 15 of the Zoning Ordinance. The BUILDING ENVELOPE STANDARDS set the basic parameters governing building construction, including the building envelope (in three dimensions) and certain required/permitted elements, such as BALCONIES, STOOPS, and STREET WALLS.

A. General Guiding Principles

1. Buildings are aligned and close to the STREET.
Buildings form the space of the STREET.
2. The STREET is a coherent space, with consistent building forms on both sides of the STREET.
This agreement of buildings facing across the STREET contributes to a clear public space and community identity.
3. Buildings oversee the STREET (and SQUARE) with active fronts.
This overview of the STREET contributes to vital and safe public space.
4. Property lines are physically defined by buildings or STREET WALLS.
Land should be clearly public or private—in public view and under surveillance or private and protected.
5. Buildings are designed for towns and cities.
Rather than being simply pushed closer together, as in many suburban developments, buildings must be designed for the urban situation within towns and cities. Views are directed to the STREET and the garden/courtyard, not toward the neighbors.
6. Vehicle storage, garbage and mechanical equipment are kept away from the STREET.
7. Retail on the GROUND FLOOR (for MAIN STREET locations).
Retail helps to make the STREET active and interesting.
8. Parking (not including on-street parking) should be away from the STREETS and shared by multiple owners/users.
9. Historic Character.
Those structures that have historic character should be preserved in some manner or their elements incorporated in the redevelopment of their site.

B. BUILDING ENVELOPE STANDARDS: MAIN STREET SITES

1. Height Specifications

Building Height

1. Principal building height is measured in STORIES. These parameters preserve appropriate STREET-space and allow for greater variety in building height.

2. Each building shall be between 3 and 6 STORIES in height, except where otherwise noted here or in the REGULATING PLAN.

Parking Structure Height

No parking structure within the BLOCK shall exceed the EAVE height of any building (built after 2002) within 40 feet of the parking structure.

GROUND STORY Height

1. The GROUND STORY floor elevation shall be between 6 inches below and 24 inches above the sidewalk elevation at the front of the building. The maximum floor-to-floor STORY HEIGHT limit for the GROUND FLOOR is 24 feet.

2. The GROUND FLOOR shall have at least a 15 foot clear (floor to ceiling) height for at least 1/3 of its area contiguous to RBL frontage.

Upper STORIES Height

1. The maximum floor-to-floor STORY HEIGHT limit for STORIES other than the GROUND STORY is 14 feet.

2. At least 80 percent of the upper STORIES shall each have at least an 8 foot 10 inch clear (floor to ceiling) height and a minimum 10 foot clear height for the uppermost STORY.^{18B}

Mezzanines

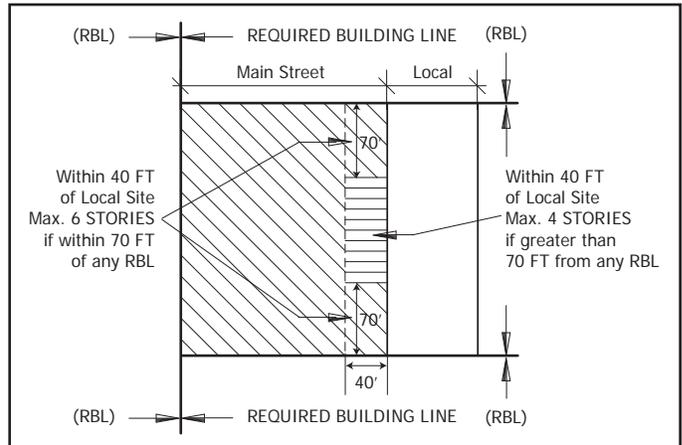

Mezzanines greater than 2/3 of the floor area footprint shall be counted as full STORIES.

STREET WALL Height

1. Any unbuilt ALLEY and/or COMMON LOT LINE frontage shall have a STREET WALL built along it, 7 feet in height.

2. STREET WALL heights are measured relative to the adjacent sidewalk or to the ground elevation when not fronting on a sidewalk.

1. Height Specifications (continued)^{12A}

Other^{12A}

Notwithstanding the provisions in Section III.A.6.1, except where a lower height is required by the Regulating Plan, where any portion of a Main street site is within 40 feet of:

1. A Local or LIVE-WORK site (excluding LIVE-WORK* sites), the maximum height for that portion is no more than 4 STORIES, unless that portion is also no more than 70 feet from an RBL, in which case the maximum height is no more than 6 STORIES.

2. A Neighborhood site, the maximum height for that portion is no more than 3 STORIES.

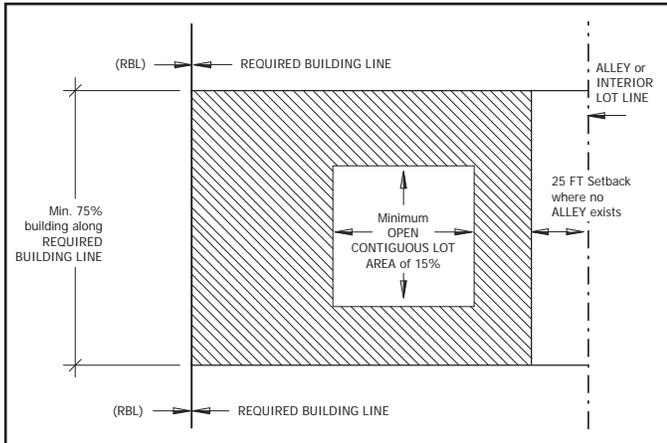

3. An existing single-family lot, the maximum height for that portion is 32 feet to the EAVES or PARAPET, and no more than 3 STORIES.
