

Planned Lee Highway Bus Stop Improvements

Revised on April 13th 2018

Guide Summary: The following document details the bus stop improvement recommendations on Lee Highway as part of Arlington County's "Lee Highway and Washington Boulevard Bus Stop Consolidation and Accessibility Improvements Project". The document lists bus stops that fall within or near the boundaries of each civic association along the Lee Highway corridor. Bus stops are often listed in multiple civic association tables. Tables include bus stop regional ID numbers, the closest intersection on Lee Highway to each stop, and information detailing Arlington County's improvement recommendations. Civic association tables are listed from east, at the front of the document, to west, at the end.

Related Terms:

- 1) *Americans with Disabilities Act (ADA) compliance:* A bus boarding area must have dimensions of 5 feet by 8 feet (5x8), with a clear and level surface, to be considered compliant with ADA standards. The most frequent ADA upgrade in this project is expanding the sidewalk at the boarding/exiting area to a 5x8 foot area. Other ADA upgrades include: clearing the boarding/exiting area; replacing cracked or damaged sidewalks; and leveling the boarding/exiting area.
- 2) *Removal:* Several stops are planned for removal due to their close proximity to other stops, low ridership, or due to safety concerns with their location. Removing stops will help to increase the efficiency of bus service and in some cases improve pedestrian and traffic safety.
- 3) *Relocation:* Several stops are planned for relocation to improve bus stop spacing, reduce safety issues, and to create opportunities to bring all bus stops into ADA compliance. Most relocations involve moving bus stops less than 200 feet away (i.e. less than a block) from their current locations.

Note: Some of the planned improvements require easements from private landholders that need to be obtained by the County before the recommendations can be implemented. Easements are often needed for the expansion of bus boarding/exiting areas, the relocation of bus stops, and the addition of new amenities. If changes are made to the proposed recommendations because the County was not able to obtain an easement, this document will be updated. All revisions since the release of this document (on November 4th 2017) are listed on Page 11.
