

**SITE PLAN REVIEW COMMITTEE
MEETING AGENDA**

DATE: Thursday, October 26, 2017
TIME: 7:00 – 9:00 p.m.
PLACE: 2011 Crystal Drive, 11th Floor
Arlington, VA 22202

SPRC STAFF COORDINATOR: Matt Ladd, 703-228-3525

Item 1. Crystal Square North Retail (SP #90) 7:00 – 9:00 p.m.
(RPC # 34-020-248 through -251, 34-020-037, and 34-026-033)
Planning Commission and County Board meetings TBD.
Peter Schulz (CPHD Staff)

The Site Plan Review Committee (SPRC) is comprised of Planning Commission members, representatives from other relevant commissions and several appointed citizens. The SPRC reviews all site plans and major site plan amendments requests, which are submitted to the County Board and the Planning Commission for consideration. The major responsibilities of the SPRC are the following:

1. Review site plan or major site plan amendment requests in detail.
2. Advise the Planning Commission by recommending the appropriate action in regard to a specific plan and any conditions, which it might determine to be necessary or appropriate.
3. Provide a forum by which interested citizens, civic associations and neighborhood conservation committees can review and comment on a particular plan, or the effects that the proposed project might have on the neighborhood.

In order to save copying costs, staff has selectively chosen the reduced drawings to be included in this package. The complete full size drawings are available for review in the Arlington County Zoning Office, 10th Floor, Courthouse Plaza, 2100 Clarendon Boulevard and also in the Central Library's Virginia Room, 1015 N. Quincy St., (703) 228-5990.

For more information on the Arlington County Planning Commission, go to their web site
<http://commissions.arlingtonva.us/planning-commission/>

For more information on the Site Plan public review process, go to the Arlington County Planning Division's web site on Private Development
<http://projects.arlingtonva.us/private-development/>

To view the current Site Plan Review Committee schedule, go to the web site
<http://commissions.arlingtonva.us/planning-commission/sprc/>

ITEM 1
Crystal Square North Retail
(SP #90)

(RPC # 34-020-248 through -251, 34-020-037, and 34-026-033)
Elizabeth Gearin, SPRC Chair

SPRC Agenda: First Meeting—October 26, 2017

- 1) Informational Presentation
 - a) Overview of Site Plan (Applicant)
 - b) Review of Site Plan Proposal (Staff)

- 2) Land Use & Zoning
 - a) Relationship of site to GLUP, sector plans, etc.
 - b) Relationship of project to existing zoning
 - i) Special site designations (historic district, etc.)
 - ii) ~~Requested bonus density, height, etc. (if any)~~
 - iii) Requested modification of use regulations

- 3) Site Design and Characteristics
 - a) Allocation of uses on the site
 - b) Relationship and orientation of proposed buildings to public space and other buildings
 - c) View vistas through site
 - d) Visibility of site or buildings from significant neighboring perspectives
 - e) Compliance with adopted planning documents

- 4) Building Architecture
 - a) Design Issues
 - i) Building form (height, massing, tapering, setbacks)
 - ii) Facade treatments, materials, fenestration
 - iii) Roof line/penthouse form and materials
 - iv) Street level activism/entrances & exits
 - v) LEED Score
 - vi) Accessibility
 - b) Service Issues
 - i) Utility equipment
 - ii) Venting location and type
 - iii) Location and visibility of loading and trash service
 - iv) Exterior/rooftop lighting

- 5) Open Space
 - a) Orientation and use of open spaces
 - b) Relationship to scenic vistas, natural features and/or adjacent public spaces
 - c) Compliance with existing planning documents and policies
 - d) Landscape plan (incl. tree preservation)

- 6) Transportation
 - a) Infrastructure
 - i) Mass transit facilities and access
 - ii) Street systems (w/existing and proposed cross sections)
 - iii) Vehicular and pedestrian routes
 - iv) Bicycle routes and parking
 - b) Traffic Demand Management Plan
 - c) Automobile Parking
 - i) Proposed v. required (tenant, visitor, compact, handicapped, etc.)
 - ii) Access (curb cuts, driveway & drive aisle widths)
 - d) Delivery Issues
 - i) Drop offs
 - ii) Loading docks
 - e) Signage (parking, wayfinding, etc.)

- 7) Community Benefits
 - a) Public Art
 - b) Affordable Housing
 - c) LEED
 - d) Other

- 8) Construction issues
 - i) Phasing
 - ii) Vehicle staging, parking, and routing
 - iii) Community Liaison

Site Location:

The block bounded by 15th Street South, Crystal Drive, 18th Street South, and Jefferson Davis Highway. The proposed new theater and retail spaces will front on Crystal Drive and 18th Street. The proposed plaza will be along the north side of 18th Street between Crystal Drive and S. Clark/Bell Streets.

cklein@ojb.com

BACKGROUND: Crystal Square is a 15-acre mixed-use development by the Charles E. Smith Company originally approved by the County in 1972. It consists of 1.3 million square feet of office space, approximately 155,000 square feet of retail space, most of it in the Crystal City Underground, and 387 multi-family apartment units. The project was completed in the late 1970's. Much of the area of the site plan is encumbered with street easements. Typical of the era, the development is in a superblock, and the street face of the development largely consists of blank walls or parking and loading facilities. Apart from a small section along Crystal Drive constructed in the late 1990s, almost all retail is internal and accessed through the Crystal City Underground network. There are private plazas about one-story above grade between the buildings. All buildings are also connected through the underground.

The most recent site plan amendment was approved by the County Board in December 2015 for the previous owners of the development (Vornado), and approved a renovation to the Crystal Square 3 office building that would have added approximately 10,000 square feet of retail space, reskinned the building, and an improved streetscape. That plan will not be implemented by the new site owners, JBGSmith, who now plan to redevelop the building as residential in a separate filing and review process from the subject application.

The following provides additional information about the site and location:

Site: The subject site is within the existing Crystal Square site plan area (SP #90) and has the following adjacent uses:

- To the north: Across 15th Street South is Jefferson Plaza (SP #51), a mixed-use development of offices and hotel (Crowne Plaza) zoned “C-O”. The site is designated “High” Office-Apartment-Hotel (up to 3.8 FAR office, commercial and hotel, up to 4.8 FAR residential) on the General Land Use Plan (GLUP). The site is also located within the Crystal City Coordinated Redevelopment District (CCCRD).
- To the east: Across Crystal Drive is the Crustal Park mixed office and residential development with ground floor retail, and the Water Park. All are part of SP#167 and zoned “C-O-1.5”,) Both sites are designated “Low” Office-Apartment-Hotel (up to 1.5 FAR office and commercial, up to 72 units/acre residential, up to 110 units/acre hotel) on the GLUP and are in the CCRD.
- To the south: There is an 18,500 square-foot parcel of land on the north side of 18th Street South that is owned by the Washington Metropolitan Area Transit Authority, and zoned “M-2.” The developer has a surface easement on this property, but is not permitted to construct buildings on this parcel. Across 18th Street South, the

Crystal Mall mixed-use site plan (SP #56), zoned “C-O”. The site is designated “High” Office-Apartment-Hotel on the GLUP.

To the west: Jefferson Davis Highway is the western boundary of the site.

Zoning: The site is zoned [“C-O” Mixed-Use District, a small \(700 s.f. portion of the site is zoned “M-2”\).](#)

General Land Use Plan Designation: The site is designated “High” Office-Apartment-Hotel (up to 3.8 FAR office, commercial and hotel, up to 4.8 FAR residential). The site is also located within the Crystal City Coordinated Redevelopment District (CCCRD) on the GLUP, and the site has a triangle designating general locations for public open space on the south side of the block, on the north side of 18th Street (“Market Square”).

Neighborhood: The subject site is in the Crystal City Civic Association area.

DISCUSSION: The current site consists of four (4) high-rise office buildings and an apartment building constructed over a podium that contains retail uses that are largely internal and below grade and connected with the Crystal City Underground. The developer proposes to renovate a portion of the existing site to create approximately 84,000 square feet of additional retail space in three (3) new spaces:

1. A three-level Alamo Drafthouse movie theater fronting on Crystal Drive to be constructed between two (2) of the existing office buildings.
2. A one-level addition to the office building at 1550 Crystal Drive to create space for a grocer. As well as having a street level presence on Crystal Drive retail spaces 1 and 2 will also be integrated into the Crystal City Underground.
3. A standalone two (2)-story building located at the northwest corner of Crystal Drive and 18th Street. This building will incorporate elevators down to a new eastern entrance to the Crystal City Metro Station.

**EXISTING AND PROPOSED BUILDING
CONSTRUCTION TYPES KEY PLAN**

Proposed Development: The following table provides the development potential and the preliminary statistical summary for the requested site plan:

Site Area¹: 439,231 s.f. Total 438,531 S.f. zoned "C-O" 700 s.f. zoned "M-2"	DENSITY ALLOWED/TYPICAL USE	MAXIMUM DEVELOPMENT
"C-O" By-Right	One-family dwellings: one Unit per 6,000 s.f. of lot area; Office: 0.6 FAR	One-family dwellings: 73 units Office: 263,539 s.f. of g.f.a.
"M-2" By right	Commercial: 1.5 FAR	Commercial: 1,050 s.f. of g.f.a.
"C-O" Site Plan	Base density of up to 4.8 FAR density residential Base density of up to 3.8 FAR commercial/office/hotel	2,108,309 s.f. FAR residential or 1,666,418 s.f. FAR comm./office/hotel

Adopted Plans and Policies: The following regulations, plans, and guiding documents are applicable to development on this site (in order of most general guidance to most specific):

- *General Land Use Plan (GLUP)*;
- “C-O” Zoning Ordinance Regulations;
- *Arlington Retail Plan*;
- *Crystal City Sector Plan*.

GLUP: The site is designated “High” Office-Apartment-Hotel (up to 3.8 FAR office, commercial and hotel, up to 4.8 FAR residential). The site is also located within the Crystal City Coordinated Redevelopment District (CCCRD) on the GLUP, and the site has a triangle designating general locations for public open space on the south side of the block, on the north side of 18th Street (“Market Square”).

The developer’s proposed development does not require a change to the land use category of the General Land Use Plan, nor a rezoning to “C-O-Crystal City”, but the development should be analyzed in whether it meets the Sector Plan goals. The developer’s proposed density, at 3.61 FAR, is within the density range specified in the GLUP.

Zoning: The existing zoning is “C-O” Mixed Use District. The developer does not propose to change the existing zoning. “C-O” permits, with special exception site plan approval commercial office and retail uses of up to 3.8 FAR and residential uses at a 4.8 FAR. The applicant’s proposal is under 3.8 FAR. Bonus density is not requested or required to facilitate this development.

Arlington Retail Plan: The west side of Crystal Drive and north side of 18th Street South are designated “Gold” Streets. Gold streets are defined as: “Streets planned for any type of retail use or retail equivalent as permitted by the Zoning Ordinance. Exterior and interior design elements as set forth in the Retail and Urban Design Guidelines.”

Crystal City Sector Plan: The Crystal City Sector Plan was adopted in 2010, and has detailed guidance for the coordinated redevelopment of Crystal City. The subject site is in one of the most important areas of Crystal City, the “Central Business District”, where the highest intensity uses are contemplated, and contains one of the most important public open spaces envisioned in the Sector Plan, the “Metro Market Square”.

All references are to the relevant chapter or figure in the [Sector Plan](#).

General Guidance

- The site is in the “Central Business District” district of Crystal City (3.3.2), oriented “around the existing Metro Station entrance, Metro Market Square and Center Park (Figure 3.3.6).”
- With “the convergence of the existing and proposed public transportation components in Crystal City (Metro, transit, VRE, bus, carpool), this location is optimally positioned to support additional commercial density. As the existing Metro Station entrance will be retained, a second entrance to the Metro station is envisioned in the proximity of 18th Street and Crystal Drive.” (3.3.2.)
- Maximum building heights: 300 ft./200ft. (Figure 3.8.5).
- Tower coverage limitations apply only to buildings greater than five (5) stories (3.8.6).

- Within 250 feet North of the Metro Market Plaza on 18th Street, mixed uses are recommended with a minimum 70% of office use; Mixed use with minimum 40% residential elsewhere (Figure 3.9.1).
- Retail frontage is recommended along Crystal Drive and on the north side of Metro Market Plaza, as well as retention of the Crystal City Underground (Figure 3.9.3). A grocery store near 18th Street is encouraged (3.9.5.).
- Service and loading should be limited to a new Clark-Bell Street (Figure 3.9.4).

Open Space Guidance

This site contains one of the key recommended public parks in the Crystal City Sector Plan: The Metro Market Square. It is one of a handful of parks and open spaces that have very detailed guidance in the Sector Plan.

“The Central Business District will contain three of the largest open spaces proposed in the plan... The proposed Metro Market Square is envisioned as a vibrant pedestrian center and marketplace, with robust retail frontage, market shed and kiosks, and café seating. Traversed by commuters, its programming will entice many to linger and enjoy the space. ... Over time, this district and these open spaces will take on an image as the heart of Crystal City. ... Metro Market Square...will celebrate the existing and future second entrance to Metro and will be a retail oriented square with market structures for fairs, carnivals and farmers’ market activities.” (3.3.2)

The Plan goes into greater detail on Page 83:

“Metro Market Square is located along 18th Street between Clark-Bell and Crystal Drive and will have a target size of 43,900 square feet. This space will provide for and celebrate a new entrance to the Metro Station at the east end of the plaza and will be a primary center of retail activity. The ground plane of Metro Market Square will be finished primarily in hard surfaces which will allow for market uses, temporary pushcart retail, public gatherings, outdoor entertainment, and a variety of related uses. Metro Market Square could also create an opportunity for crafting a permanent market building arcade along the length of the plaza which could be used for a local farmer’s market, arts and crafts festivals, and/or carnivals. The head house on the east end of the market arcade could be the new entry to the Metro Station. A major connection across 18th Street to the Center Park should be emphasized in the plaza design. Small water features, benches, café seating, larger interactive sculptures, chess tables, bosques of trees, and similar features should be incorporated into the overall design.”

4 - METRO MARKET SQUARE

Retail Square - Boston, MA

Retail Square - Boston, MA

Figure 1--Page 83 of Sector Plan

Density and Uses: The applicant proposes to take advantage of approximately 165,000 s.f. of available density within the existing “C-O” zoning.

The proposed uses and density are in harmony with the envisioned uses for the site in the *Crystal City Sector Plan*.

Site and Design: The Alamo Theater and the potential grocery site are infill development that will bring a significant retail and commercial presence to this stretch of Crystal Drive, a goal of the current Sector Plan. In the absence of the ability to completely redevelop the block, such

infill developments can still meet the spirit and intent of the Sector Plan to encourage retail and entertainment for future and existing residents.

One of the most notable features is the incorporation of a new eastern entrance to the Crystal City Metro station, with an escalator entrance on Crystal Drive near the corner of 18th Street, and elevators to the mezzanine incorporated into the third retail building. The applicant proposes that the building be incorporated in to the significant grade change between South Bell Street to the west and Crystal Drive”. As proposed, the applicant’s plan would result in a two-level open space, with a smaller open space along Crystal Drive, and behind it to the west, a wall of about 20 feet behind it, with the majority of the plaza behind it on a higher level. The developer proposes to connect the two levels with a staircase, and to mask the wall with a water feature.

Proposed open space: The Crystal City Sector Plan, as stated above, envisions an approximately 44,000 square foot open space to be dedicated to the County as a Metro Market Square. Staff continues to work with the applicant on this issue as to the and delivery of the open space.

Building Architecture

The proposed architecture generally presents a glass and dark metal contemporary retail façade with a semi-industrial look to the street rights-of-way.

Above the first level of the movie theater, glass is replaced with a decorative metal screen at the mezzanine level (additional detail of which will be needed), and gray panels on the second level. A translucent feature stretching upward two (two) stories breaks the plainness of the upper stories.

The third level of the theater is set back from the lower levels, presents a plain gray wall to Crystal Drive. The developer’s plans state “potential art” and additional information will be needed on the visibility of this wall from public rights-of-way.

Transportation: This project is in Crystal City in the block bounded by 15th Street S., Crystal Drive, 18th St S, and S. Bell Street within the area of the Crystal City Sector Plan (CCSP). The focus of the project is along the 15th Street S., Crystal Dr., and 18th Street S. frontages. The site is accessible by multiple modes of transportation to allow for flexibility in access to the site. The Crystal City Metrorail station, serving the yellow and blue lines, and associated bus stops are located adjacent to the site at the intersection of S. Bell Street at 18th Street S. On the east side of the project there are several bus stops along Crystal Drive in front of the proposed project site, and the Virginia Railway Express (VRE) station is within ¼ mile of the site. Additionally, there are two Capital Bikeshare stations adjacent to the northeast and southwest corners of the block.

Streets and Sidewalks: The Master Transportation Plan (MTP) identifies 18th Street S., 15th Street S., and Crystal Dr. as Type A-Primarily Retail Oriented Mixed-Use and S. Bell Street. as Type B-Primarily Urban Mixed-Use Arterials. Adjacent to the site, 15th Street S. is two travel lanes in each direction separated by a landscaped median with several larger trees. Westbound 15th Street S becomes five travel lanes at the intersection with S. Bell Street and continuing under Jefferson David Highway to accommodate right and left turn lanes. Crystal Drive consists of one

travel lane southbound, two travel lanes northbound, a center turn lanes, bike lanes in both directions and parking on the east side. At the intersections with 18th Street S. and 15th Street S. the center turn lane transitions to a dedicated turn lanes. S. Bell Street is two-three travel lanes in the southbound direction with two building over the roadway for approximately half of the length of S. Bell Street.

The project proposes to modify the streetscape and travel lane configurations on 15th Street S., Crystal Dr. and 18th Street S. There is a County project in design that focuses on the road cross sections of S. Clark- S. Bell Street, 15th Street S, and a portion of Crystal Drive near 15th Street S. The applicant and the County are coordinating the design of 15th Street S, Crystal Dr., and 18th Street S. to ensure the applicant's proposed revisions are coordinated with the County project. At this time, it appears the applicant will be constructing portions of the work area within the County project limits. No changes are proposed to S. Bell Street except at the intersection with 18th Street S.

The Crystal City Sector Plan (CCSP) specifies 18th Street S. follow the 18'-22' – commercial/mixed sidewalk frontage guidance and 15th Street S., Crystal Dr. and S. Bell Street follow the 15' to 18' commercial/mixed sidewalk frontage guidance. Both of these frontage guidelines include a 6' minimum clear sidewalk, 6' minimum street tree and furniture zone with a variable width café/shy zone.

The project proposes to improve the streetscape along the frontage of the buildings along 15th Street S., Crystal Dr. and 18th Street S. Along 15th St S. the streetscape is proposed to be 15' including a 6' tree zone, 8' clear sidewalk. Along Crystal Dr. the streetscape is proposed to be a minimum of 18' including a 6' tree zone, 8' clear sidewalk, and the balance as a shy zone adjacent to the buildings. Along 18th St S. the streetscape is proposed to be 12' including a 6' tree zone, 6' clear sidewalk. The streetscape along S. Bell St. is remaining as existing today.

Trip Generation: A Traffic Impact Analysis (TIA) was submitted by the applicant, prepared by Gorove/Slade dated October 13, 2017. This analysis consists of two scenarios – one scenario with the proposed redevelopment as discussed above and shown on the proposed plans and one scenario with the proposed redevelopment plus the additional redevelopment of the 1770 Crystal Drive building as a residential building. The 1770 Crystal Drive redevelopment is not a part of this proposed site plan, but subject to an additional site plan to be reviewed in the near future. As the impacts to the entire block are reviewed, staff directed the applicant to complete the analysis of the two scenarios now to determine the overall impacts to the entire block. The analysis looked at twenty (20) intersections around the site. The TIA is still being reviewed by staff.

Parking and Loading: There is an existing parking garage under the entire block that is utilized by all the buildings on site. Loading areas are proposed to be added and reconfigured based on the use of the proposed buildings. A loading area for the grocery store is proposed off of 15th Street South. Parking and loading requirements are still being evaluated. Loading movements are still being evaluated as well.

Modification of Use Regulations:

Parking: Parking ratio, parking space width, percentage of compact spaces.

Exclusions: The developer proposes exclusions from calculations of gross floor area for approximately 9,900 square feet for new and relocated arcade areas in the Crystal City Underground, and approximately 16,000 square feet of new below grade storage space.

Site Plan Mitigation: Standard benefits expected of all site plans (with no additional density granted) to mitigate the effects of the proposed plan include:

- On site public art or \$75,000 contribution;
- Streetscape per Sector Plan;
- Transportation Demand Management;
- Ordinance-based affordable housing contribution.

Major Staff Issues: The following issues are major issues identified by staff:

Agenda Item 2)iii.: Requested exclusions of arcade space and underground building storage. While there is evidence (but not explicit) in the original approval of this site plan in the 1970s that the arcades within the Crystal City Underground were excluded from density calculations for the Crystal Square project, there is no adopted County policy nor Zoning interpretation that would permit staff to support exemption of such areas. The Zoning Ordinance defines gross floor area as “the sum of the area of the horizontal surface of the several floors of a building measured from the exterior faces of exterior walls, to include all floor area not defined as gross parking area.”

In addition, the applicant is proposing to convert nearly 16,000 square feet of what is retail space inside the Underground to building storage. Exclusions of below-grade building storage from density have been supported by staff in the past, but staff cannot recall a precedent for converting such a large amount of existing retail space, which counts for gross floor area whether above or below grade, into building storage and then excluding the area from gross floor area calculations.

Agenda Item 3: Two-story corner retail building (Building #3)—The applicant proposes to place this building in what is planned to be an important public park, one of the most important open spaces envisioned in the Sector Plan. While the Sector Plan contemplates structures such as market sheds or a market-style “head house” (using examples such as Quincy Market in Boston), the Sector Plan did not envision an enclosed, private retail space at this location. Construction of such a building will limit the County’s options in using the space in the way envisioned in the Sector Plan. In addition, the developer’s proposed solution to the grade change in the site would result in really two (2) plazas, with a significant change in elevation that would discourage the traversal by commuters as envisioned in the Plan. It is more likely pedestrians will use the public sidewalks than use stairs.

Agenda Item 5: Can the applicant provide a viable 43,900 square foot open space for the County

Park system, as recommended in the Crystal City Sector Plan?

Issues identified by SPRC: TBD
